

TRAINING PROGRAM

KENNAMETAL KNOWLEDGE CENTER

KNOW-HOW IS THE KEY TO SUCCESS!

The key to being successful and abreast with competition is “Technical Training”.

Especially in a global environment, the competencies and expertise of your employees are an important highlight feature in differentiating yourself from the competition. Competency and education are essential for process optimization in manufacturing and for solving technical challenges.

The Kennametal Knowledge Center offers metal cutting training and strives to support its customers to be ahead of the competition. Our courses are product independent, detailed

and yet easy to understand. They match a valuable mix of theory and best practice paired with the latest manufacturing and tooling strategies and developments.

TECHNICAL TRAINING

METAL CUTTING

State-of-the-art know-how in metal cutting in a two-day course.

TRAINING CONTENTS

- Drilling, turning and internal machining
- Milling with indexable inserts
- Fundamentals of materials science and cutting materials
- Milling with solid carbide tools
- Fundamentals of metalworking
- Tapping and tap forming
- Reaming process
- Insert failure analysis

The training contents are harmonized with and adjusted to the participants experiences and know-how. In addition, we can also offer individual technical training on site. Just contact us by mail or phone.

The theoretical part can be supplemented by practical exercises in our test and demonstration center accompanied by your application engineers instructors.

PARTICIPANTS e.g.
machine operators and setters, planners, programmers, instructors and trainees, as well as technical sales staff with a basic knowledge in metal cutting.

POWERED BY

NOVO[™]

kennametal.com/NOVO

YOUR BENEFIT

Latest machining technologies in theory and practice!

TECHNICAL EQUIPMENT

For example in our Test & Demonstration Center in Fürth, Germany

- 5 training rooms with modern equipment
- Test and demonstration center
- 2 CNC lathe machines
- 5 CNC machining centers
- Modern measuring equipment & accessories
for example: presetting device, measuring microscope, surface measuring devices, shrinking devices, etc.
- Tool Management

You will learn all about cost reduction, quality and efficiency improvement, competitiveness and state-of-the-art processing techniques. Hand in hand with increasing digitization.

TECHNICAL TRAINING IN YOUR COUNTRY

Participants: max. 15-25
Training location: In local country.
Please, contact us for further information.
Language: In local language

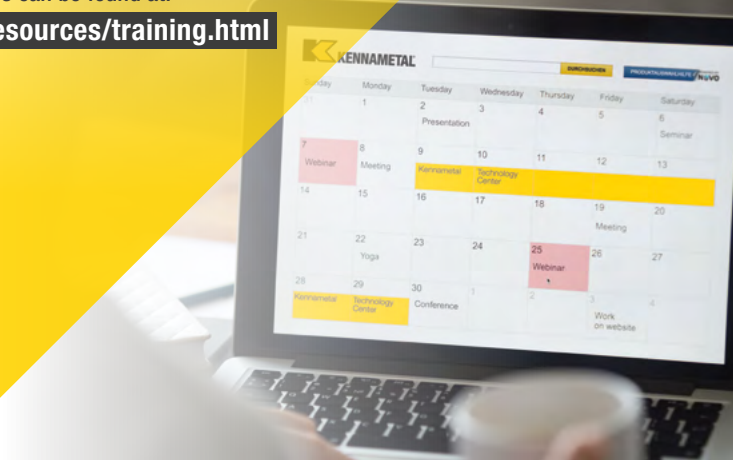

TRAINING SCHEDULE & REGISTRATION

Two-day courses - online, at your site or at our Kennametal Centers in EMEA/ESSER region
